strong reason #2

strong reason #3

The hotel has 486 guests checked-in. How many more guests need to come to fill all 720 rooms in the hotel?

There are 12 dots altogether.

There are 3 equal groups. How many are in each group?

_____ dots in each group

$12 \div 3 = \underline{\quad}$

The dots are in groups of 4.

How many groups are there?

_____ groups of dots

$12 \div 4 = \underline{\quad}$

Partition the line into 4 equal parts.

Label each fraction on the line.

$\frac{1}{4}$ $\frac{4}{4}$ ~~$\frac{2}{4}$~~ $\frac{0}{4}$ $\frac{3}{4}$

- 4:45
- 5:45
- 9:25

I can describe the relationship between a series of historical events.

Having a Ball

The game of basketball was invented over 100 years ago in 1891. Dr. James Naismith was a PE teacher in Massachusetts. He was asked to invent a lively game that was easily learned, so the students could play inside during the bitter winters. The sport Naismith invented looked very different than basketball today. The first game was played with 9 players on each team because Dr. Naismith had 18 students in his class. Today, there are only 5 players on each team. The ball was a soccer ball and instead of nets they used actual baskets nailed to the walls. Every time someone made a basket the janitor had to bring out the ladder and climb up to get the ball out! Eventually a hole was made in the bottom of the basket so a stick could be used to push the ball up and out. During the first game, they realized a name was needed for this new sport. Someone suggested it be called *Naismith Game* after the inventor, but Dr. Naismith disagreed. "We have a ball and a basket; why don't we call it basketball?" The name has stuck. Today children and adults all over the world enjoy playing basketball. It's a good way to exercise, but more than that, it's an excellent way to have fun! Dr. Naismith never made any money from his invention. Perhaps the next time you pick up a basketball you can think of that PE teacher nailing baskets on the wall so long ago.

What event happened?

Basketball was invented.

Why did it happen?

Where and when did it happen?

Who was involved?

What were some important actions or decisions?

What was the end result?

Why does it matter today?
